- Additional lower back protection
- Low profile fit
- Thumb loops at end of sleeves

The XION® Long Sleeve Jacket "Wheels" is our first product and flagship specifically designed to protect any rider on wheels. A low-profile protective undergarment providing optimal protection and freedom of movement.

The protective pads are made of the revolutionary material called D3O® (dee-three-oh) which is made of "Intelligent Molecules" that flow with you as you move but on shock/impact lock together (in a fraction of a second) to absorb the impact. These flexible D3O pads cover the elbows, triceps, shoulders, chest, back & gator and come in pockets so you can choose which pads you want to use or leave out.

The integrated waistbelt has elastic straps to adjust to the body circumference to ensure a snug fit.

The main fabric of the the garment is made of a strong, stretchable and breathable fabric, especially designed for the sports industry. The elbow and shoulder areas are covered with a durable abrasion resistant fabric.

AREAS OF USE

- Stunts
- Extreme sports
- (Motor) cycling
- Horse riding
- Police - Motorcycle Police

Just like stunt professionals and extreme sports athletes, riders on wheels also need full freedom of movement without compromising on protection. After numerous requests, we decided to design a garment specifically serving the protective needs of riders. Simultaneously, we designed a unique co-branded protective base layer For the British motorcycle brand Triumph which has been launched in spring 2018. Besides these developments, we also won a European Tender for motorcyclists of the the Madrid Metropolitan Police, which gave us further insights in motorcyclists needs. We're excited to continue our quest to bring our stunt expertise to different markets with the highest quality impact protection.
